

TREE CARE PACKAGE

Our Tree Care Package is a service we provide to help our customers start their investment off on the right foot and provides continued health for the life of the tree. This package includes a Systemic Insecticide for bore beetles, aphids and other insects, Granular Fertilizer to feed your tree and a Root Stimulator to promote hair roots.

SYSTEMIC INSECTICIDE

The Systemic Insecticide helps keep bore beetles, aphids, and other insects from harming the tree. It's applied over the rootball via water, to be absorbed into the roots and up into the tree.

GRANULAR FERTILIZER

The Granular Fertilizer is applied on top of the rootball and slowly releases into the soil to the root system of the tree which then makes its way into the canopy of the tree as well.

ROOT STIMULATOR

The Root Stimulator helps establish new roots, and reduces stress to the tree. This stimulator is applied over the rootball.

Melad Tree Care Package should be applied annually for the life of the tree. The best time of the year to apply this is February through April.
